

Commencement Program

171st Commencement
University of Maryland
College Park Campus
December 22, 1973

Chancellor's Message

Excellence is measured by our commitment to discover knowledge. It is reflected in a spirit of inquiry, within a context of concern for humanity. It is our resolve that this Campus be a center where people come together for the common purpose of releasing their creative energies in the discovery of knowledge, a place where expectations are high and where expectations are matched by performance.

Excerpt from *Report to the Campus*
October, 1973
Charles E. Bishop, Chancellor

Order of Exercises

December 22, 1973

10:00 a.m.
Cole Student Activities Building

PRESIDING

Dr. Charles E. Bishop
Chancellor, College Park Campus

PROCESSIONAL

Triumphal March, Hector Berlioz
University Band and University Chorus
Conductor, John Wakefield

INVOCATION

The Reverend L. James Downs
Roman Catholic Chaplain

THE NATIONAL ANTHEM

Led by
Dr. Paul Traver

GREETINGS

Dr. Wilson H. Elkins
President of the University

Dr. Louis L. Kaplan
Chairman, Board of Regents

MUSICAL SELECTION

The Battle Hymn of the Republic,
William Steefe
University Band and University Chorus
Conductor, Dr. Paul Traver

ADDRESS

Mr. David R. Brower

CONFERRING OF DEGREES

Dr. Elkins, Honorary Degree
Dr. Bishop, College Park Campus

REMARKS TO GRADUATES

Mr. Timothy John Brennan
Graduating Senior

Dr. Bishop

THE ALMA MATER

HAIL! ALMA MATER!
Hail to thee, Maryland!
Steadfast in loyalty
For thee we stand.
Love for the Black and Gold,
Deep in our hearts we hold,
Singing, thy praise forever,
Throughout the land.

BENEDICTION

The Reverend Elizabeth Platz
Lutheran Chaplain

RECESSIONAL

University Band
Conductor, John Wakefield

The College Park Campus and The University

The Students

College Park is dedicated to young people. The Campus gives all students the chance to encounter new persons, new ideas and new interests, all of which they could hardly find elsewhere in such variety. Students may discover ancient Greece for the first time; they may try their hand at art; or they may use a computer to help design a better environment for man.

But whatever they investigate, whether it is under a microscope, or out in space or within the human mind, their experiences sharpen their vision and improve their judgment. They learn in and out of class, by relating to many people of their own age and by dealing with a cultured faculty. They are able, in these many ways, to better define their directions and their goals.

The Faculty

Men and women of varied personalities and interests instruct our students, scholars whose work ranges from the study of physical forces to the study of man in all his complexities. One professor studies properties more fundamental than the atom; another measures laser distances to the moon with an accuracy of inches; another simulates a computerized "electric avalanche" to study the effects of lightning; another leads students to excavate the ruins of Pompeii; while still another visits Maryland's marshes to better understand and ultimately preserve for all of us one of Maryland's particular treasures, the Chesapeake Bay.

One way to describe this Campus is through the interaction of student and faculty, but other points of view are interesting too.

The Campus

Located in suburban Maryland just nine miles from the Nation's Capitol, the College Park Campus offers a diversity of cultural, political and scientific resources to its students.

The Campus is a spacious one of 1,300 acres. Some of its 228 Georgian-style buildings overlook playing fields, the tree-lined central mall, or rolling lawns, while one or two border the few remain-

ing open fields of grazing land belonging to the University.

In enrollment, College Park is among the largest Campuses in the country. Undergraduates enrolled in fall, 1973 numbered 26,192 and graduate students 7,107 for a total enrollment of 33,299. This year's College Park operating budget is over \$115,000,000, and the University assisted over 6,000 College Park students with scholarship aid in 1972-73.

Undergraduates may choose from 71 programs for a major and graduate students from 61 graduate programs. In number of doctorates granted annually, the University ranks among the top thirty in the nation.

History

The University had its beginnings in 1807 with the establishment in Baltimore of the College of Medicine, an entirely faculty-owned institution granting the M.D. degree. When its name was changed to the University of Maryland five years later, it was given power to confer additional degrees. The first dental school in America, the Baltimore College of Dental Surgery, became a part of the University in 1840. Subsequently, the University opened schools of pharmacy, law and nursing.

Under a charter secured by a group of Maryland planters, the College Park Campus of the University, then called the Maryland Agricultural College, opened in 1859 and became one of the original land-grant schools in 1865. After a disastrous fire in 1912, the State acquired control of the College and bore the cost of rebuilding. In 1920 the State took over the faculty-owned University in Baltimore, merging it with the State-owned institution at College Park to form the present day University of Maryland.

In 1886 the Delaware Conference Academy was founded by the Methodist Church in Princess Anne, Maryland. The State acquired this institution in 1926, making it a division of the University of Maryland in 1948. It was made a Campus of the University system in 1970 as the University of Maryland Eastern Shore (UMES). A new Campus known as University of Maryland Baltimore County (UMBC) was opened at Catonsville in 1966.

Research Facilities

Among the exceptional research facilities are: a 140 MeV cyclotron; a nuclear reactor; scanning electron microscopes; subsonic, supersonic and hypersonic wind tunnels; an electron ring accelerator; a precision encoder and pattern recognition device; a gravitational radiation detection system including a gravimeter on the moon; a quiescent plasma device (Q machine); a psychopharmacology laboratory; three retro-reflector arrays on the moon; rotating tanks for laboratory studies of meteorological phenomena; Van de Graaff accelerators; a laboratory for basic behavioral research; an assortment of computers; the Astronomy Observatory, Center of Materials Research, Institute for Fluid Dynamics and Applied Mathematics, Institute for Molecular Physics, and the Water Resources Research Center.

The College Park Campus also owns and operates one of the largest and most sophisticated long-wavelength radio telescopes (located in Clark Lake, Calif.) and a cosmic ray laboratory (located in New Mexico).

In addition to these research opportunities in the biological, mathematical and physical sciences, research programs in the behavioral sciences, social sciences and education exist in many bureaus and institutes including: the Bureau of Business and Economic Research, Bureau of Educational Research and Field Services, Bureau of Governmental Research, Institute for Child Study, Institute for Criminal Justice and Criminology and the Institute for Urban Studies.

Libraries

University libraries include approximately 1,350,000 volumes on the College Park Campus, 15,000 subscriptions to periodicals and newspapers, plus nearly 730,000 microform units, as well as many slides, film strips, prints, music scores, and recordings. The new Undergraduate Library has a seating capacity of 4,000 students and is among the nation's largest. The library features a recreational reading collection of 5,000 paperbacks, and quadrophonic concert room, color video tape players and playback units, enclosed rooms equipped with instructor's consoles for the use of nonprint media materials, and wireless stereo headsets for tapes of lectures, plays, speeches, and music.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession are of ancient origin. They have been the traditional costume of the scholar since medieval times and probably represent an adaptation of the ecclesiastical dress since many of the scholars of that period were members of monastic orders.

An intercollegiate commission in 1893 drafted a uniform code for costumes which has since been adopted by the majority of colleges and universities in the United States.

Each of the three academic degrees—bachelor, master, and doctor—has its own distinctive gown and hood. The bachelor's gown is distinguished by its long pointed sleeve. The master's gown has a longer, narrow, closed sleeve, extending below the knee; the arm is passed through a slit at the elbow. In contrast the doctor's gown has a full bell-shaped sleeve with three bars of velvet. The opening of this gown is faced with wide velvet bands. The velvet trim may be black or of a color indicating the general field of learning of the wearer, for example, blue for philosophy, green for medicine, purple for law.

The most colorful and distinctive item of the academic costume is the hood which passes around the neck and extends down the back. The doctor's is the largest of the hoods and the bachelor's the smallest. The bachelor's hood is often omitted. The color of the velvet edging indicates the field of learning. Below is given a list of department or faculty colors.

Agriculture/Maize
Arts, Letters, Humanities/White
Business Administration, Commercial Science/Drab
Dentistry/Lilac
Economics/Copper
Education, Pedagogy/Light Blue
Engineering/Orange
Fine Arts, Architecture/Brown
Forestry/Russet
Home Economics/Maroon
Humanics/Dark Crimson

Laws/Purple
Library Science/Lemon
Medicine/Green
Music/Pink
Nursing/Apricot
Oratory/Silver Gray
Pharmacy/Olive
Philanthropy/Rose
Philosophy/Blue
Public Health/Salmon
Physical Education/Sage Green
Science/Golden Yellow
Social Service/Citron
Surgical Chiropody/Nile Green
Theology and Divinity/Scarlet
Veterinary Sciences/Gray

The colors of the silk lining exposed in the center of the hood are those of the college or university which conferred the degree.

The cap or "mortar board" is uniform in design for all degrees. The tassel may be either black or the color of the field of learning. The tassel of the doctor's cap may be gold.

Academic Degrees

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by American colleges and universities.

The first known degree was a doctorate conferred by the University of Bologna in the middle of the 12th Century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to give instruction to students. The bachelor's or baccalaureate degree indicated only entrance upon a course of study preparatory to the doctorate or mastership. Gradually, however, the bachelor's degree came to mean successful completion of one level of study preparatory to the higher degrees.

From Europe the use of academic degrees spread to English universities. Harvard University, William and Mary, and Yale followed the British pattern in the United States.

The Doctor's Degree

This is a term meaning teacher, or instructor, applied by ancient Romans to those who delivered public lectures on philosophical subjects. In the Middle Ages, from the 12th century, it came into use as a title of honor borne by men of great learning. It was first made an academic title at the University of Bologna, in Italy, which received from the Emperor the right of appointing *doctores legum* (doctor of laws). The University of Paris followed in 1145. Soon after, the popes granted the universities the right of appointing doctors *canonum et decretalium* (teachers of the canon law); and when the study of civil law came to be combined with that of the canon law, the title was changed to doctor *utriusque juris* (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

The doctorate in philosophy and science, and occasionally in theology and law, is given beyond the baccalaureate degree, and requires two to five years, the writing of a thesis, and the passing of written and oral examinations.

The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the professional or practitioner's degree, and the research degree. The first type represents advanced training for the practice of various professions, principally: Doctor of Medicine, Doctor of Dental Surgery, Doctor of Veterinary Medicine, Juris Doctor and Doctor of Pharmacy. These degrees carry no implication of original research and are classified by the U.S. Office of Education, with bachelor's degrees, as the first professional degrees. The University of Maryland awarded the first two dental degrees in history, on March 9, 1841, and invented the name of the degree, D.D.S. as well.

The second type of doctor's degree is classified as research doctorates representing prolonged periods of advanced study usually accompanied by a dissertation which is designed to be a substantial contribution to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of Philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States by Yale University in 1861.

The first Ph.D. was awarded at the University of Maryland in 1920.

The Master's Degree

The master's degree is an academic honor conferred upon students who have successfully completed work in advance of the baccalaureate. A thesis and an oral examination are usually required. The word magister connected with a qualifying phrase, was used among the Romans as a title of honor; but its present meaning must be traced to the time of the establishment of the oldest universities. Regularly organized faculties were not then known as they now exist in the universities. The whole circle of academic activity was limited to seven liberal arts, and those who received public honors on the completion of their course of studies, for their diligence and knowledge, and had already received the degree of baccalaureus (bachelor) were called magistri artium (master of the liberal arts).

In 1920 the new University of Maryland awarded its first M.A. and M.S. degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents completion of a four-year course of study of collegiate grade and is the oldest academic degree used by American institutions of higher learning. The degree Bachelor of Arts was first conferred in America in 1642 on the first nine graduates of Harvard College.

Maryland Agricultural College, which was later to become the University of Maryland College Park, awarded the first Bachelor of Arts and Bachelor of Science degrees in 1862.

First Aid

Mr. Jerrold Witsil, Director, Public
Safety, Public Safety

Mr. L.B. Jankowski, University Police,
Traffic Control & Parking

David R. Brower Honorary Doctor of Humane Letters

An unrelenting leader of the conservation movement for thirty-seven years, David Brower has an immense reputation as a defeater of dams and defender of the wilderness. As first Executive Director of the Sierra Club for seventeen years, Brower fought many environmental battles and became one of the most powerful voices in the nation's conservation movement.

In the early nineteen fifties in his fight to preserve Dinosaur National Monument, Brower gathered together sportsmen, ecologists, wilderness preservers, and park advocates into the first effective coalition of conservationists. This effort became the birth of the conservation movement.

Since then he has continued to work as a conservationist. In 1969 he founded Friends of the Earth, an international organization, which he serves as President. He co-founded the John Muir Institute for Environmental Studies, serving as Director from 1969-71, and has also founded independent conservation organizations in England, France, Sweden, and Canada.

Born in Berkeley, California on July 1, 1912, Brower attended the University of California briefly. His career in the conservation movement began in 1933 when he became a volunteer for the Sierra Club. He was elected to the Board of Sierra Club in 1952, and during his tenure as executive director from 1952 until his resignation in 1969, membership in the club expanded from 7,000 to 77,000 members. A skilled skier and mountaineer, he expanded the club's Wilderness Outings Program, establishing knapsack, river and threshold trips, and personally leading some 4,000 people on prolonged trips into the remote wilderness.

During those years Brower also fought several major national park campaigns, helping to establish Kings Canyon National Park, preventing the loss of timberlands from Olympic National Park, and establishing the Redwood National Park and the Point Reyes National Seashore.

He played a vital role in the creation of North Cascades National Park and the National Wilderness Preservation System and was the originator of the Outdoor Recreation Resources Review.

Brower worked as an editor for the University of California Press from 1941 until 1952. He spent the war years preparing manuals and instructing U.S. army troops at the Mountain Training Centers in Colorado and West Virginia and serving in combat in Italy. He was awarded the Combat Infantryman's Badge and the Bronze Star.

He has had a prolific career as writer and award-winning editor of wilderness and mountaineering books. Among books edited by Brower are the Sierra Club's Exhibit Format Series, which includes *This Is the American Earth*; *These We Inherit: The Parklands of America*; and *In Wildness Is the Preservation of the World*. For the Friends of the Earth organization he has produced the series, *The Earth's Wild Places*.

Brower has received certificates of merit from groups such as the National Parks Association in 1956 and the Audubon Naturalist Society of the Central Atlantic States in 1967. He has received honorary degrees from Hobart and William Smith Colleges, 1967; Claremont College Graduate School, 1971; Starr King School for the Ministry, 1971; and the University of San Francisco, 1973.

He is awarded the Honorary Doctor of Humane Letters from the University of Maryland.

Candidates for Degrees

The 1973 class roster is comprised of degree candidates from the undergraduate and graduate programs at the University's College Park Campus since August 1973. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The University reserves the right to withdraw or add names. All diplomas will be mailed by the Registrar's Office.

Students who have completed teacher education programs and appropriate documents may obtain Maryland Teaching Certificates in the College of Education Records Office (Room 3201) between 11:00 a.m. and 1:00 p.m. today, December 22, 1973.

Graduate School August 24, 1973

Toward Public Service Employment: A
Research Survey and Empirical
Analysis of Variance*

Paul Stanley Szczepanek
Physics: *The Measurement and Analysis
of the Strain Optic Spectra of Gold*

Augustine Anthony Tieri
Education-Human Development:
*Inter-Age Perception: How Old and
Young People View Themselves and
Each Other with Regard to Evaluative
Attitudes Toward Human Life*

Wen Feng Tseng
Mechanical Engineering: *Direct
Observation of the Structure of Grain
Boundaries in the FeCo Alloy*

Walter Lyman Upson II
Physics: *CNO Abundancies in the Sun
and Arcturus and the $^{12}\text{C}/^{13}\text{C}$ Ratio in
Arcturus*

Muralidhara Rao Varanasi
Electrical Engineering: *Systematic
Codes and Their Application to
Computer Systems*

Jearl Dalton Walker, Jr.
Physics: *The Effects of
Extra-terrestrial Dust and Large Scale
Pressure Systems in the Lower E and
Upper D Regions on Night Glows as
Seen by OGO-4*

Vera Irmgard Wentworth
German: *Georg Hermann Und Das
Budermeier*

Arthur Kirkwood West
Physics: *Dynamics of a Stochastic
Model for Vertebrate Striated Muscle
Contraction*

Johanna Smith Wood
Education-Administration, Supervision
& Curriculum: *An Analysis of the
Effect of the Instructional
Development Institute Program on
Attitudes of a Selected Group of Public
School Personnel Toward Utilization of
the Systems Approach in Instructional
Development*

Doctor of Education

Peter Anthony Bielski
Education-Administration, Supervision
& Curriculum: *An Investigation of the
Effect of Simulation on Teacher
Acceptance of Pupil Response*

Robert Charles Cooksey
Education-Industrial Arts: *The
Development of an Achievement Test
in Power Mechanics at the Teacher
Education Level*

Joseph Exline
Education-Secondary: *A Study of
National Trends in Earth Science
Education and the Status of Earth
Science Education in Virginia*

Richard Logsdon Resurreccion
Education-Industrial Arts: *The
Development of Building Construction
Regulations for Single Family Detached
Housing Systems, 1951 to 1971*

John Henry Werner
Education-Administration, Supervision
& Curriculum: *The Willingness of a
Community College Faculty to Use
Television as a Medium of Instruction as
Related to Its Familiarity with Films
and Its Years of Teaching Experience*

Doctor of Musical Arts

Ada Julia Lasansky
Music: *Barcarola*

Sharon Guertin Shafer
Music: *A Survey of Igor Stravinsky's
Songs*

Graduate School December 22, 1973

Candidates will be presented by
Dr. David S. Sparks,
Dean for Graduate Studies

Doctor of Philosophy

Nuha Haim Abudabbeh

Rehabilitation Counseling: *Offender Risk Taking and Stimulation Seeking Behavior: An Experimental Investigation of Two Hypotheses*

Chung Hyun Ahn

Chemical Engineering: *The Effect of Coagulation on Particle Size Distribution of Sub-Micron Aerosols*

Charles Alexander, Jr.

Electrical Engineering: *Linear Tuning of Variable Frequency Networks*

Thomas George Althen

Animal Science: *Growth Hormone in Genetically Obese and Lean Swine*

Douglas Lane Archer

Microbiology: *L-arginine: Its Role in Maintenance of Epstein-Barr Virus and Control of Immune Product Synthesis in Burkitts Lymphoma-derived Cell Lines*

Cary Bruce Barad

Counseling and Personnel Services: *Role Conflict Among Vocational Evaluators: Sources, Precursors, and Adjustive Correlates*

Nita Hale Barbour

Early Childhood-Elementary Education: *Relationship of Change in Child Language to Nursery School Climate as Determined by Teacher Verbal Behavior*

Anthony Allen Bednarczyk

Food Science: *Identification and evaluation of the Flavor-Significant Components of Ginger Essential Oil*

Lawrence James Boyle

Economics: *Analysis of Hydro-electric Industry in Quebec*

Gail Susan Bradbard

Counseling & Personnel Services: *Minimal Brain Dysfunction with Hyperactivity: A Comparison of the Behavioral and Cognitive Effects of Pharmacological and Behavioral Treatments*

Robert Clayton Bradshaw

Economics: *A Theoretical and Empirical Analysis of U.S. Bank Euro-dollar Borrowing, 1966-1971*

Steve Bravy

Mathematics: *Generalizing the Grothendieck Prime Spectrum*

Alice Sally Brew

Counseling and Personnel Services: *Effects of a Counseling Workshop on Adult Women and Counselors*

William James Burns

Secondary Education - Mathematics: *A Study of Interaction Between Aptitude and Treatment in the Learning of a Computer Programming Language*

B. G. Carter

Government and Politics: *Genes and Politics: A Constructive Critique of Paul Ramsey and Leon R. Kass*

Augustine Yim-Pan Cheung

Electrical Engineering: *Microwave Studies of Magnetically Induced Momentum Coupling in Laser-Produced Plasmas*

David William Coder

Mechanical Engineering: *Implicit Solutions of the Unsteady Navier-Stokes Equation for Laminar Flow Through an Orifice*

Michael Alan Cohen

Horticulture: *An Anatomical and Growth Regulator Study on Dwarf Shoot Apices of Pinus ponderosa*

Steven Charles Cohen

Physics: *Semiclassical S Matrix Theory of Vibrational Energy Transfer and Excitation in Collisions of Diatomic Molecules*

Craig Martin Cook

Computer Science: *Grammatical Inference by Heuristic Search*

Marsha Zelia Cummins

English: *Antonin Artaud's The Theatre and Its Double: An Analysis of Its Genesis, Its Intention and Its Influence in Modern Theatre*

Joseph Kenneth Daugherty

Physics: *Measurement of Cosmic Ray Positron and Negatron Spectra Between 50 and 800 MeV*

John Michael Davidson

Physics and Astronomy: *Study of the Level Structure of ^{19}Ne , Using the Reaction $^{17}\text{O}(^3\text{He},n\gamma)^{19}\text{Ne}$*

William Allan Donnelly, III

Economics: *An Econometric Model of Net Labor Migration in the United States, 1965*

Paul Francis Dvorak

Germanic and Slavic Languages: *Desire for Change and Individual Failure: An Attempt to Synthesize the Works of Wolfgang Koeppen by Means of the Antitheses of Positive Action and Personal Resignation*

Thomas Walton Eastman

Science Education: *The Development and Validation of an Environmental Attitude Measure with Predictive Validity*

Kenneth Henry Eckels

Microbiology: *Virion and Soluble Antigens of Japanese Encephalitis, and Closely Related Arboviruses*

Mohammad Shaaban El-Azhary

Government and Politics: *Potential Groups in American Politics - The Case of American Jews*

Hosni Mohamed Elnigoumi

Agricultural and Resource Economics: *Transportation Between Sudan and Libya as a Means For Socio-Economic Development: Beef and Oil*

Paul David Elstein

Government and Politics: *A Longitudinal Analysis of the Legislative Behavior of Freshman United States Senators*

Charles Joseph Errico

History: *Foreign Affairs and the Presidential Election of 1940*

Jacob Exler

Biochemistry: *Partial Purification and Properties of B-Glucuronidase from the American Oyster, Crassostrea virginica (Gmelin)*

Daniel Herbert Fishman

Computer Science: *Experiments with a Resolution-Based Deductive Question - Answering System and a Proposed Clause Representation for Parallel Search*

Jerry Richard Fram

Physics: *The K^+p Interaction at 473 MeV/c and 590 MeV/c*

Herbert Lundy Garris

Government and Politics: *Constitutional Revision in Virginia: An evolution of the Democratic Process, 1968-1970*

Tove Helland Hammer

Psychology: *The Influence of Supervisory Behavior on Subordinates Motivation: A Model and a Measure of Leadership*

Ann McIntosh Hoffelder

Science Education: *The Development and Evaluation of Three Types of Instructional Organizing Materials for Introductory College Chemistry*

Robert Steen Hornady

Plasma Physics: *Analysis of Two Nonneutral Plasma Equilibria, Measurement of the Trapped Electron Energy Distribution*

Chih Ming Hu

Physics: *Rotational Stokes' Resistance of a Prolate Spheroid in an Incompressible Viscous Fluid under Perfect Slip*

Anne Skone Jameson

Elementary Education: *An Analysis of Self-Esteem and Academic Achievement of Tri-Racial Isolate, Negro and Caucasian Elementary and Middle School Boys and Girls*

Thomas Burton Kaiser

Physics and Astronomy: *The Behavior of Charged Particle Distributions in Time-Independent Stochastic Magnetic Fields*

Ronald Lee Kimball

Psychology: *Effects of Pretherapy Manipulations on Measures of Group Cohesion*

- Gerald Lee Klingaman
Horticulture: *Reduction of Ambient Air Pollution Injury to Foliage of Chrysanthemum morifolium Ramat. Using Tolerant Cultivars and Chemical Protectants*
- Elizabeth Janssen Koopman
Institute for Child Study: *Identity Formation Processes in Volunteer and Nonvolunteer University Students*
- Robert J. Korbach
Economics: *A Regional Environmental Input-Output Model*
- Brian Marc Krupp
Astronomy: *A New Analysis of the $A^2\Delta$ - X^2II System of CH and the Carbon Twelve/Carbon Thirteen Ratio in Arcturus*
- Allan Reid Kuhns
Chemical Engineering: *Thin Film Formation by Photopolymerization of 1, 3-Butadiene*
- Pauline Sheplan Lerner
Chemistry: *Proteolipids in Brains of Normal Mice and Myelin Deficient Mutants: Developmental Studies and Subcellular Localization*
- William Henry Licata
Electrical Engineering: *Dominant Pole Identification Applied to the Low Order Modeling Problem*
- Pearl Caren Lipsie
Counseling and Personnel Services: *An Investigation of Effects of the Transitional Workshop Program on the Work Attitudes, Work Habits and Sensitivity Worker Role, Demand and Self Concepts of the Mentally III*
- Ann Seymour Madison
Institute for Child Study: *Psychophysiological Responses of Female Nursing Home Residents to Back-massage*
- Swadesh Mitter Mahajan
Physics and Astronomy: *Equilibrium and Stability Properties of Relativistic E-layers and Electron Rings*
- Raul Torino Mainardi
Physics and Astronomy: *A Measurement of the Cosmic Ray Be/B ratio at Energies > 1.5 Gev. using a Large Area Proportional-Scintillation Counter Stack*
- Luis J. Matienzo
Chemistry: *Part I. Applications of X-Ray Photoelectron Spectroscopy to the Study of Inorganic and Organometallic Complexes of Nickel, Palladium, Platinum and Molybdenum. Part II. The Synthesis and Characterization of Some Novel Polydentate Phosphorus-Nitrogen Ligands*
- Ernest Charles Mauch
Industrial Education: *Using Placebos in Teaching Vocational Education*
- Terrence Joseph McCreary
Electrical Engineering: *On Adaptive Equalizers*
- Charles David McGlothlin
Chemistry: *The Coulometric Determinations of Galactose Oxidase Activity, Galactose in Serum, and Copper in Aqueous Solution*
- Charles Anthony Meegan
Physics and Astronomy: *A Measurement of the Primary Cosmic-Ray Electron Spectrum from 6 GeV to 100 GeV*
- Otho Ernest Michaelis IV
Animal Science: *Studies on the Mechanism of the Sucrose Effect in *Rettus norvegicus albinus**
- David Lee Milgram
Computer Science: *Web Automata*
- Manuel Lopez Morales
Counseling and Personnel Services: *School of Psychology: Effects of Schedules of Observed Reinforcement and Observer's Deprivation Level on Persistence in Imitating*
- Edward E. Morler
Administration, Supervision, and Curriculum: *A Study of the Effects of Transcendental Meditation on Selected Dimensions of Organization Dynamics*
- Patrick Munley
Psychology: *An Exploratory Investigation of the Relationship Between Erik Erikson's Theory of Psychosocial Development and Vocational Behavior*
- James Jeremiah Nolan
Counseling and Personnel Services: *A Comparison of the Effects of the SDS versus Group Counseling on Occupational Information Seeking Behavior*
- Arnold Williams Orvedal
Chemistry: *Studies of Anions Containing 4n π n-Electron Rings*
- Joe Louis Padgett
Secondary Education: *A Study of the Influence of Synthetic Relevancy Teaching Methods on Student Attitudes Toward and Achievement in the Physics Portion of a Physical Science Course for Pre-Service Nursing Students*
- Whiton Stewart Paine
Institute for Child Study: *Effects of Two Sequences of Group Dynamics Models on Student Performance in a Discussion Course*
- Sulur Pachayana Thever Palaniswamy
Civil Engineering: *Optimization of Traffic Flow on a Restricted Facility - A Conceptual Framework*
- Neil Jeffrey Pearl
Chemistry: *Reactions of Bicyclo(5.1.0.) octadienes and Cycloheptatrienes with Potassium Amide in Liquid Ammonia; NMR Studies of the 8, 8-Dimethylcyclooctatrienyl Anion; NMR Studies of Cyclononatryl Anions*
- Eulah Blue Peters
Secondary Education: *A Study of Student Attitudes relating to Certain Instructional and Socio-Economic Factors in Junior High School General Music Classes in Eight Baltimore City Public Schools*
- John H. Pflaum
Institute for Child Study: *Development of a Life Quality Inventory*
- Wallace Kimball Pond
Administration, Supervision, and Curriculum: *Interrelationships Between The Organizational Climates of Secondary Classrooms as Perceived by Both the Teachers and Students of Those Classrooms*
- Karen Logozzo Rancourt
Elementary Education: *The Moderation of Comprehension in Reading by Three Perception Formats and Three Fatigue Levels*
- Patricia Sinclair Reichelderfer
Microbiology: *Studies on the Replication of H1 Virus*
- Branimir Marian Rieger
English: *The Development of the English Literary Letter, 1500-1640*
- Curtis Robinson
Botany: *Mineral and Hormonal Effects on Growth and Morphogenesis of Mungbean (*Phaseolus aureus* L.) Seedlings*
- Norman Phillip Ross
Measurement and Statistics: *Power Comparisons of Fixed Effects Randomized Block and Analysis of Covariance Using Qualitative Concomitant Variables*
- David Parry Rubincam
Physics and Astronomy: *The Early History of the Lunar Inclination*
- Sarah Leff Schmidt
American Studies: *Horace M. Kallen and the Americanization of Zionism*
- Richard Eric Sheads
Chemistry: *Synthesis and Reactions of Benzo-Naphthotriazinones, 2,1-Benzisoxazolium Salts, and Benzo-azetinones: Formation of a Benzo-azacyclobutadiene Derivative*
- Joyce Lee Shields
Measurement and Statistics: *An Empirical Investigation of the Effect of Heteroscedasticity and Heterogeneity of Variance on the Analysis of Covariance and the Johnson-Neyman Technique*
- Jay Richard Simon
Chemistry: *Membrane Transport of Gamma-aminobutyric Acid in a Synaptosomal Fraction Isolated from Rat Brain*
- Elaine Frank Sloan
Library and Information Services: *The Organization of Collection Development in Large University Research Libraries*
- Robert Alan Smith
Physics: *On the 1 α -modulated Jovian Decametric Radiation*
- Robert Gordon Smith
Educational Administration: *The Effects of Leadership Style, Leader Position Power, and Problem Solving Method on Group Performance*

Leivy Smolar

History: *Ernest Renan and the Civilization of Ancient Israel*

Maria Elisabeth Sommer

Institute for Child Study: *An Experimental Study of Attitude Modification Through Role-Playing in Authoritarian and Democratic Orientations*

Norman Crawford Steele

Dairy Science: *Lipogenesis and Celularity of Adipose Tissue from Lean and Obese Swine*

Alan John Theiss

Physics and Astronomy: *An Investigation of the Equilibrium and Symmetric Wave Propagation Properties of Rigid Rotor Nonneutral Plasmas*

Clair Brown Vickery

Economics: *Why Unemployment Rates Differ by Race and Sex*

Melvyn Roger Viner

Astronomy: *A 26.3 MHz Radio Source Survey with an Absolute Flux Scale*

James Stanley Ward

Geography: *Geographic Dynamics of Skid Rows in North America*

Elbert Kelsey Weaver

Engineering Materials: *The Influence of Grain Size on the Mechanical Properties of the Powder Metallurgically Processed Nickel Base Alloys-Monel and Astroloy*

Doctor of Education

Frank Norman Ellis

Administration, Supervision, and Curriculum: *The Production, Development, and Validation of an Original Self-Instructional Program and Supplement on Musical Note and Rest Values in Common Time*

Doctor of Business Administration

Ronald James Webb

Business and Management: *Organizational Effectiveness in Voluntary Organizations: A Study of the Institutional Church*

Richard Paul O'Neill

Business and Management: *Transformation Methods For Column Generation Procedures in Nonlinear Programming*

Graduate School December 22, 1973

Academic Honors

Commissions

Candidates for bachelors’ degree eligible to graduate “With Honors” or “With High Honors” are so indicated in the alphabetical listings by college. These persons are eligible for the appropriate designation if they have completed at least two years of resident work (60 semester hours) at the time of graduation with a scholastic average of B or higher. (Computation does not include grades for courses taken during the last semester of registration before graduation.) The candidates must also rank in the upper fifth of the graduating class in their respective colleges. “With High Honors” is awarded to the upper tenth of those in each college, if they qualify, and “With Honors” is awarded to the second tenth of those in each college, if they qualify.

General Honors Program

Joyanna L. Samson*
Donald Joseph Waters
Michael Jeffrey Weiss

Departmental Honors

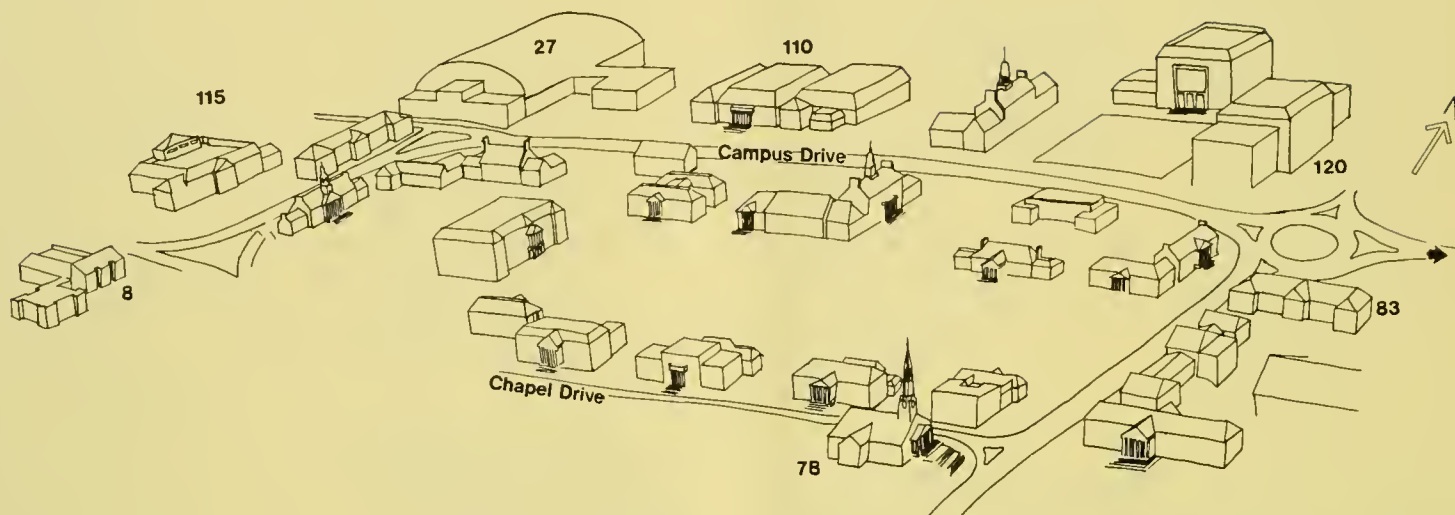

With High Honors in English
Rita Weitz Pando
With High Honors in History
G. Michael Tuerk
With High Honors in Music
Margaret M. Lacey
With High Honors in Physics
Andrew Donovan Smith
With Honors in Agricultural and Resource Economics
James E. Kirkley
With Honors in Economics
Richard Stephen Basile
With Honors in English
Madeleine Elaine Petrillo, Michael Jeffrey Weiss
With Honors in Mathematics
Timothy John Brennan
With Honors in Physics
Michael B. Rankin
With Honors in Psychology
Stuart Leslie Jacobs, Jonathan Louis Katz
With Honors in Speech and Dramatic Art
Timothy de Forest Junkin

*Graduated August 24, 1973

A Walking Tour Through the University of Maryland's College Park Campus

There are many interesting educational and research facilities on the College Park Campus. We have selected some of these that you may wish to visit along a walking tour. These facilities are open on weekdays from 8:30 a.m. to 4:30 p.m. You are welcome to tour them at your leisure. Other points of interest on Campus may be toured by appointment through the phone extension listed after each facility. For general information call the Student Union Information Center (454-2801).

Highlights

■ **MEMORIAL CHAPEL**—(BLDG. 78) Regents Drive
Open to visitors weekdays 8:30 a.m. to 4:30 p.m. A schedule of multid denominational services can be obtained in the North Administration Bldg.

■ **NORTH ADMINISTRATION BUILDING**—(BLDG. 83) Regents Drive
This facility houses the Admissions Office of the University; Office of the Registrar for grade transcripts and commencement information; and offices for student financial aid, housing, and campus employment.

■ **UNDERGRADUATE LIBRARY**—(BLDG. 120) Corner of Regents and Campus Drives
Completed in 1972, this library is one of the finest in the nation. In addition to serving undergraduate students, it also houses at the graduate level the College of Library and Information Services. Stop at the information desk if you would like a guide to point out the highlights of the library.

■ **STUDENT UNION**—(BLDG. 110) Campus Drive
A new addition to the Student Union was completed in 1972. You can obtain a building directory and schedules of events and activities at the information desk in the front lobby. Guided tours are available to the bowling alleys, billiard room, ballroom, cafeterias, motion picture theatre, and exhibits.

■ **COLE FIELDHOUSE**—(BLDG. 27) Campus Drive
With a permanent seating capacity of 12,500, the Main Auditorium of Cole Fieldhouse is used for basketball games, classes in physical education, commencements, concerts, academic testing, track, and many other indoor activities. Other areas of the building contain small gymnasiums, a swimming pool, classrooms, faculty offices, a ticket booth for athletic events, and the Department of Intercollegiate Athletics.

■ **TAWES FINE ARTS CENTER**—(BLDG. 115) Campus Drive
You are welcome to visit the Art Gallery on the first floor. Offices of the departments of art, music, speech and dramatic art, and hearing and speech sciences are housed in this building. University Theatre is also located here, adjacent to Parking Lot #1.

■ **SCHOOL OF ARCHITECTURE BUILDING**—(BLDG. 8) Campus Drive
You are invited to walk through this facility and view displays of student architectural designs and the faculty-designed sculpture pyramid in the West Court.

Tours by Appointment

CYCLOTRON, Department of Physics and Astronomy. The Cyclotron is available for touring on Mondays from 10-4 p.m. by prior arrangement. (Ext. 3521)

CENTER OF ADULT EDUCATION. The Center of Adult Education is a residential conference facility for continuing education for adults. Tours can be arranged by appointment.

LEONARDTOWN RESIDENCE COMPLEX. These new modular housing units are a unique innovation in student housing. (Ext. 4148)

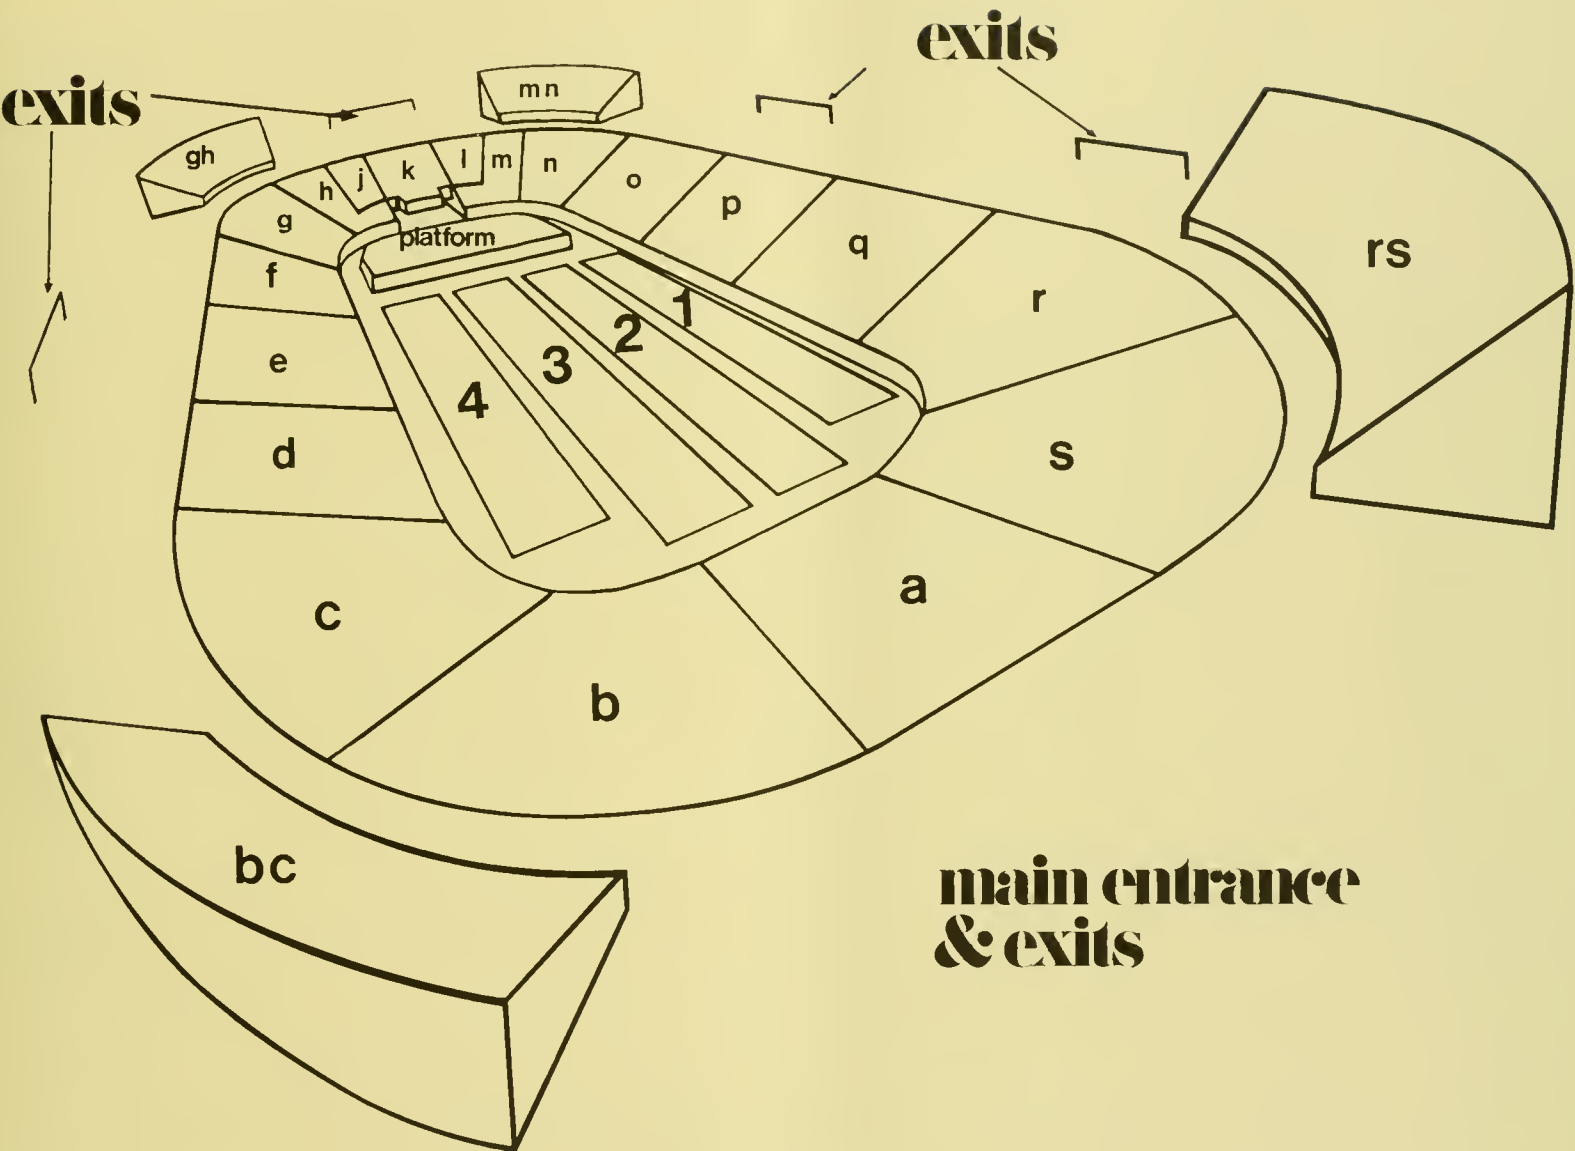

BYRD STADIUM. Football games and track and field events are held in this stadium which holds 35,000 spectators. (Ext. 4705)

McKELDIN LIBRARY. McKeldin contains materials for the use of graduate students and faculty. Tours can be arranged by appointment. (Ext. 4042)

ASTRONOMY OBSERVATORY. Open House is held on the 5th and 20th of each month at 8:30 p.m. for the general public. Large groups may call for reservations at 454-3001. (For other information call Ext. 3460).

ROSSBOROUGH INN. The oldest building on the College Park Campus, Rossborough Inn is open to the public for lunch from 11:30 to 1:30 p.m. (Ext. 3940)
